SUMMARY

Full-Stack Developer building secure, scalable web apps and APIs. Active open-source contributor with merged PRs in freeCodeCamp.org, collaborating with senior maintainers on production-ready code. Proficient in React, Node.js, TypeScript, and rigorous testing practices.

OPEN SOURCE CONTRIBUTIONS

freeCodeCamp | github.com/freeCodeCamp/freeCodeCamp

- Fixed privacy save button state bug by implementing lodash.isEqual for derived state comparison, per code review by Shaun Hamilton (freeCodeCamp Maintainer, 5+ yrs exp).
- Ensured code quality with 100% test coverage (9/9 unit tests passing); contribution approved and merged into the main production branch.
- PR (Merged) : <https://github.com/freeCodeCamp/freeCodeCamp/pull/67230>

Mongoose ODM | github.com/Automattic/mongoose

- Identified missing TypeScript type exports (Projector, ArrayOperators, QueryResultType, PluginFunction) affecting downstream library authors
- Submitted PR #16239 with comprehensive type assertion tests across 39 test files (958 assertions); fix validated by maintainers as correct and incorporated into core updates.Q
- PR: <https://github.com/Automattic/mongoose/pull/16239>

express-mongo-sanitize — npm package

- Resolved an Express 5 incompatibility by replacing a read-only getter with a sanitized static value, preventing silent req.query sanitization failures.
- Fixed 8 pre-existing test failures and implemented 4 new compatibility tests to ensure stable parsing.
- PR: <https://github.com/fiznool/express-mongo-sanitize/pull/203>

PROJECTS

Full-Stack E-Commerce Platform — MERN Stack:

- **Live App:** <https://shops-frontend.vercel.app>
- **GitHub (Dockerized)** : <https://github.com/Tidjani1Bachir/fullstack-shopsphere>
- Built a production-grade platform covering the full user lifecycle with an admin dashboard and integrated PayPal SDK.
- Engineered robust security using JWT/HttpOnly cookies, CSRF protection, NoSQL injection prevention, and multi-layer file upload scanning.
- Optimized performance with RTK Query cache invalidation and designed scalable MongoDB schemas, deployed via Vercel and Render.

- Dockerized frontend (Vite/Nginx), backend (Node/Express), and MongoDB with multi-stage builds, Docker Compose orchestration, health checks, and persistent named volumes.

Product Manager:

- **Live App:** <https://product-manager-chi-eosin.vercel.app>
- **GitHub:** https://github.com/Tidjani1Bachir/product_manager
- **Desktop (.exe):** https://github.com/Tidjani1Bachir/product_manager/releases/download/v2.3.1/product-manager_0.1.0_x64-setup.exe
- **Desktop (.msi):** https://github.com/Tidjani1Bachir/product_manager/releases/download/v2.3.1/product-manager_0.1.0_x64_en-US.msi
- Implemented a 30-day "Safety Net" recovery system for deleted items and automated PDF report generation.
- Ensured stability by writing a comprehensive automated testing suite to catch bugs pre-deployment.
- Containerized the full stack using Docker and Docker Compose, orchestrating a multi-container architecture with an nginx reverse proxy.

Product Manager — AWS Edition (DynamoDB + LocalStack):

- **GitHub:** <https://github.com/Tidjani1Bachir/product-manager-dynamodb-localstack-setup>
- Led migration from SQLite (Turso) to AWS DynamoDB, designing a scalable multi-entity schema (Products, Categories, StockHistory, AppSettings) using AWS SDK v3 and UUID v4
- Built a production-parity local environment with LocalStack and Docker, enabling seamless switching between local and AWS deployments with zero code changes

EXPERIENCE

IT Assistant / Cyber Café Operator Blida, Algeria | ~2 Months

- Provided technical support including software installation and troubleshooting
- Assisted customers with internet services, document processing

EDUCATION

Master of Science in Software Engineering (In Progress)

2024 – Present

University of Saad Dahleb – Blida, Algeria

- Relevant coursework: Software Architecture, Advanced Development Methodologies, Project Design

Bachelor of Science in Computer Systems

2020 – 2024

University of Saad Dahleb – Blida, Algeria

- Final Year Project: Lawyer-client management platform using Firebase (backend) and Android Studio / Java (mobile)

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, RTK Query

Backend: Node.js, Express.js, REST APIs, JWT Auth, Secure File Uploads

Database: MongoDB, Turso (SQLite), AWS DynamoDB (SDK v3),

Testing: Vitest, Playwright, React Testing Library, Postman

Deployment & Tools: Git/GitHub, Vercel, Render, Cloudinary, Docker, Docker Compose, LocalStack (AWS Emulator),

Languages: Arabic (Native), English (Professional Working), French (Professional Working)
